To,
The Admissions Committee

Subject: Letter of Recommendation for Aadvwaya Passi

It is with great pleasure that I recommend Aadvwaya Passi, who has worked closely with our Research & Development team at Lotus Herbals.

About Lotus Herbals

Founded in 1993, Lotus Herbals is one of India's leading beauty and personal-care companies, built on a philosophy of blending the wisdom of Ayurveda with modern science. Our products reach consumers through more than 1.5 lakh retail outlets across over 700 cities and towns in India, are used in over 15,000 salons and spas through Lotus Professional and are available in more than 16 countries. Our portfolio spans skin care, hair care, sun care and natural make-up, together with a growing family of brands including SoulTree and investments in international beauty labels. Every product is developed in our in-house R&D laboratory and made in our own manufacturing facilities in Greater Noida and Baddi, under rigorous quality control.

Aadvwaya's association with us

Over the past few years, Aadvwaya has regularly visited Lotus Herbals to assist and learn alongside our teams across functions, from marketing to production. These experiences have given him first-hand exposure to how a beauty product is conceived, formulated, tested, manufactured at scale and brought to the consumer. As he looks ahead to a future role in helping the company grow and expand globally, this grounding in both science and operations is invaluable.

This letter, however, speaks specifically to his most recent and focused contribution: the research he assisted our R&D team with on chyura butter.

Research on Chyura Butter

A highlight of Aadvwaya's work with us has been his research on chyura butter, a natural seed fat from the Himalayan "Indian butter tree" (*Diploknema butyracea*) of Uttarakhand. Recently awarded a Geographical Indication tag and actively promoted by the government for its role in supporting women-led rural livelihoods, chyura is a promising, sustainable alternative to palm oil and imported shea butter. Assisting our scientists, Aadvwaya studied its fatty-acid composition and explored why its unique balance of palmitic and oleic acids makes it an excellent moisturiser, a stable ingredient with long shelf life, and an effective base for soaps, lip balms and body butters. He [assisted in quality testing such as acid, peroxide and saponification values, and in developing trial formulations]. Through this work, he gained a strong understanding of lipid chemistry and its practical application in cosmetic science.

Personal qualities

Throughout his time with us, Aadvwaya brought the right attitude, genuine intellectual curiosity and great enthusiasm to every task. He listened carefully, asked insightful questions, and was quick to connect classroom chemistry with real-world formulation challenges. Our scientists consistently found him diligent, respectful and eager to learn, and he steadily grew in confidence and technical understanding.

Recommendation

Without hesitation, I highly recommend Aadvwaya for any programme or institution of higher learning. His blend of scientific curiosity, commitment and sense of purpose will make him a valuable addition to any academic community. We look forward to welcoming him back as an asset to Lotus Herbals, and I am confident he will make meaningful contributions to our industry, our country, and wherever his journey takes him.

Yours sincerely,

Lotus Herbals Pvt. Ltd. Sultanpur New Delhi 110 030 2, Forest Lane
